

**VERTEBRATES**

Are cold-blooded

Have scales

Lay eggs (oviparous)

# REPTILES

Are vertebrates

Most have four legs

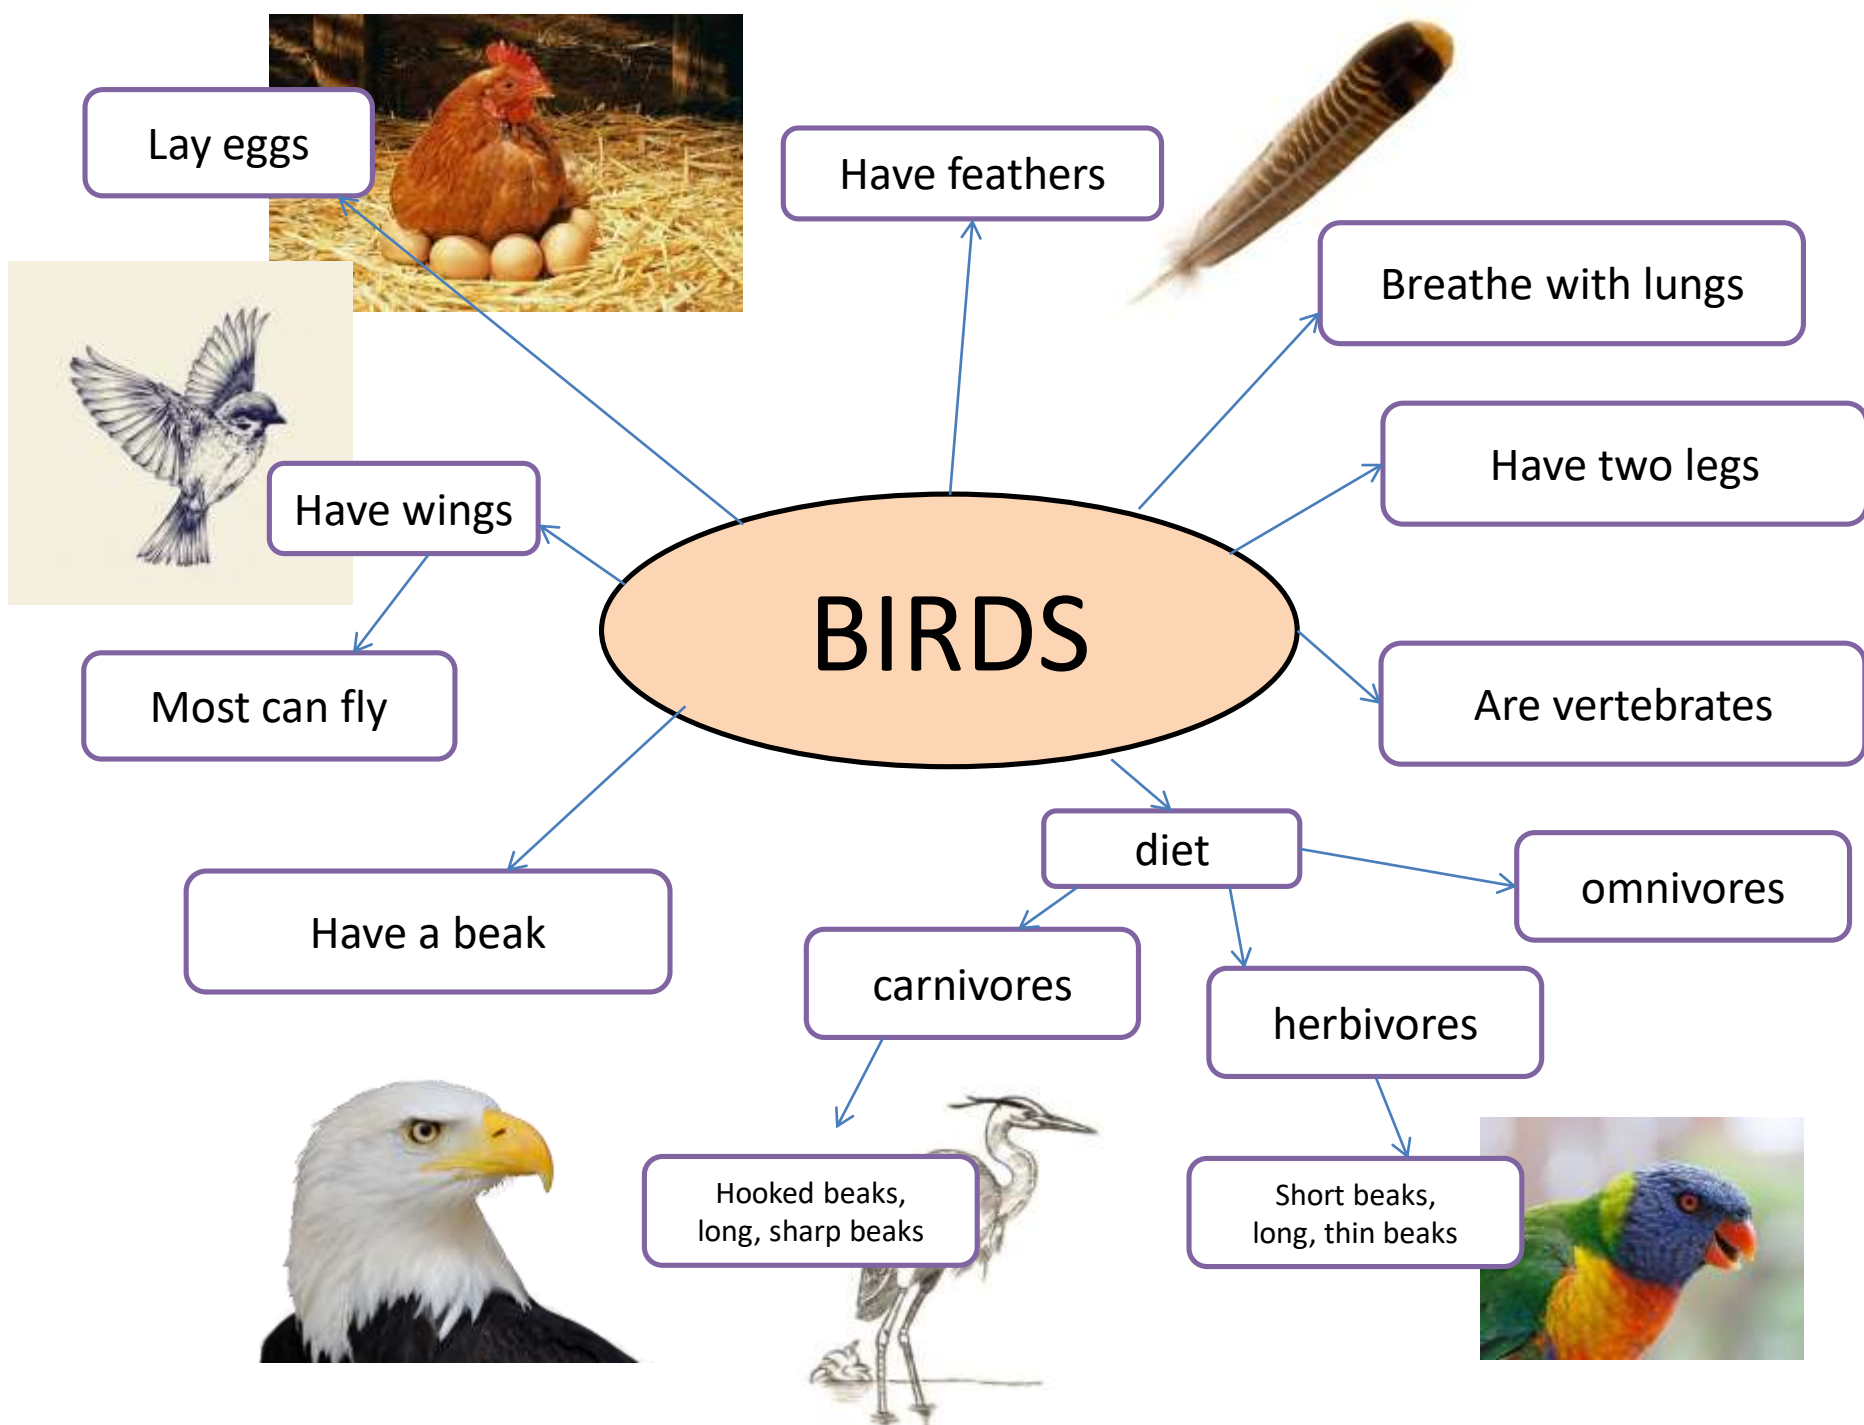

Some have no legs

Most are carnivores

Live on land and in water

Shallow the food

Are oviparous

Are vertebrates

Have fins

FISH

Have scales

Breathe with gills

Can be carnivores, herbivores or omnivores

Live in freshwater or in sea water

# Cold-blooded ANIMALS

Body temperature depends on whether its cold or hot outside.

Are vertebrates

Have moist skin

# AMPHIBIANS

Most are carnivores

Babies breathe with gills

Lay eggs in the water

Perform metamorphosis

# MAMMAL

drink their mother's milk

are born live

Are vertebrates

PROTECTING COVERING

DIET

skin

fur

omnivores

carnivores

herbivores

BODY

legs

wings

flippers

MOVE

run

walk

fly

swim

# INVERTEBRATES

Are the largest group

Have and exoskeleton

# ARTHROPODS

## GROUPS

### Crustaceans

2 body parts:  
Cephalothorax and  
abdomen  
5 pairs of legs  
2 claws  
Hard exoskeleton  
4 antennae

### Arachnids

2 body parts:  
Cephalothorax  
and abdomen  
4 pairs of legs  
8 eyes

### Insects

3 body parts:  
Head, thorax  
and abdomen  
3 pairs of legs  
2 antennae  
Most have  
wings

### Myriapods

Long segmented  
bodies  
many pairs of  
legs  
2 antennae  
Live in  
dark,damp  
places

Have one shell and a soft body

Gastropods

Have two shells and live in water.

Bivalves

# MOLLUSCS

Cephalopods

Have tentacles and a big head. Live in the sea.

## SPONGES

Live in water. They are the simplest invertebrates. They don't have nervous system, circulatory system or muscles.

# OTHER INVERTEBRATES

## ECHINODERMS

They live at the bottom of the sea. They are covered by hard, spiny skin.

## ANNELIDS

Have a long, soft body with moist skin. Many are parasites and can live inside other living things.

## CNADARIANS

Live in the sea. They have a jellylike body with one opening surrounded by venomous tentacles.
